

All questions worth 4 points.

David, Teodora, Darius, Razvan, Irina and Maia have arrived at the Museum of Natural History. They want to participate in the open pet exhibition and the contest named *Who Knows Wins*. The children want to demonstrate how well they are prepared to look after their pets.

1. What are the children visiting?

- A) The Museum of Natural History
 B) The Museum of History
 C) The Art Museum
 D) The Pet Exhibition
 E) The National Village Museum

2. When is the *Who Knows Wins* competition organized?

- A) in summer
 B) in October
 C) in spring
 D) in winter
 E) in autumn

3. What time does the museum open?

- A) 9:00
 B) 8:00
 C) 11:00
 D) 10:00
 E) 12:45

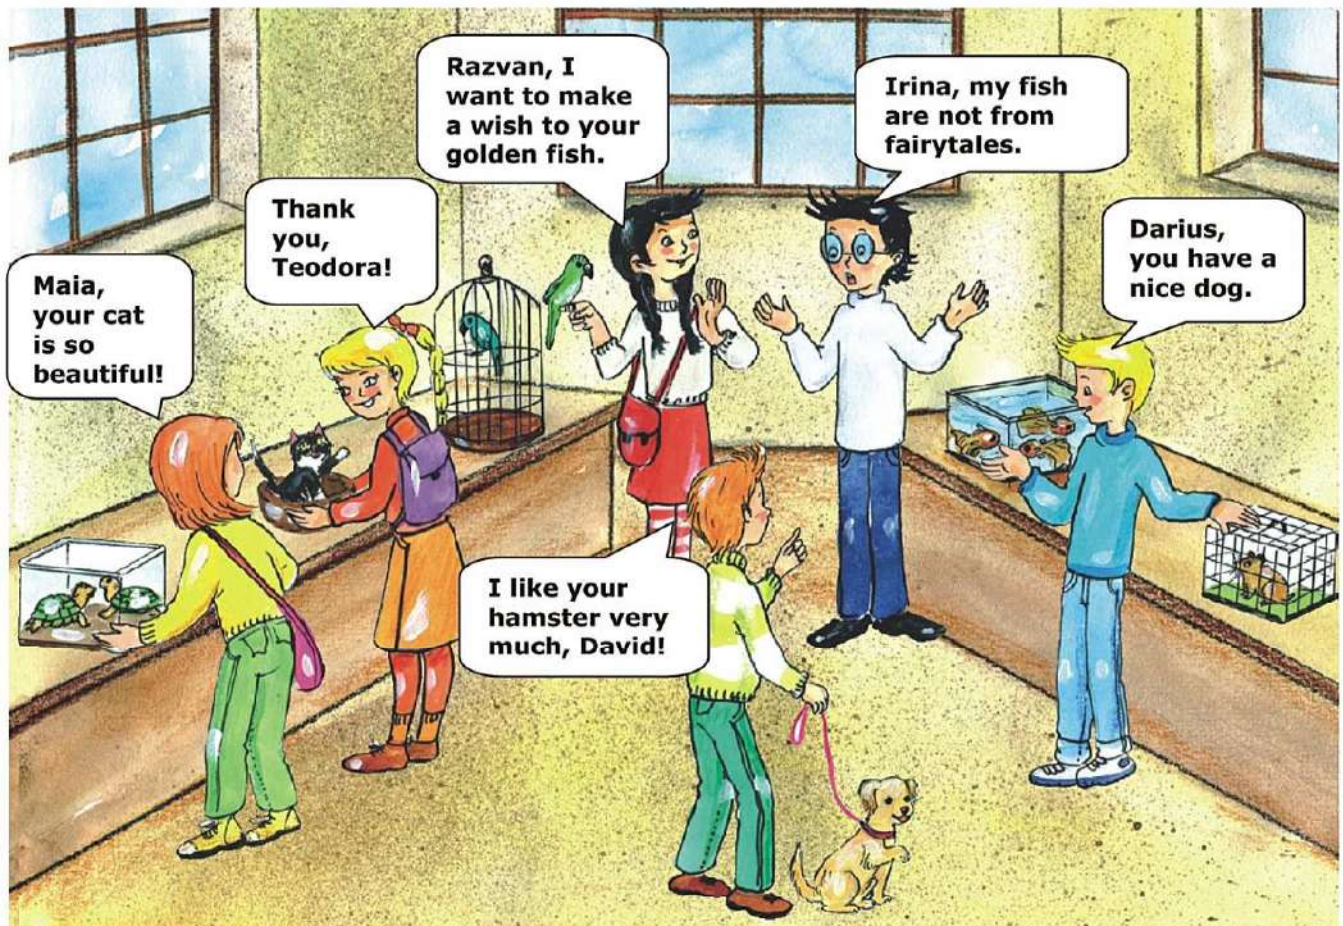

4. How many people are there in front of the museum?

- A) 8
B) 9
C) 10
D) 11
E) 12

5. What are children seeing at the museum?

- A) a sport competition
B) plane maquettes
C) pets
D) stamps
E) fruits and vegetables

The children will show visitors the pets they take care of. They can't wait to tell them about the joy these animals bring to their lives, and how they have learned to feed them, walk them, wash their cages and play with them. Only the visit to the vet is left to their parents!

6. Who has a hamster?

- A) Teodora
B) Maia
C) Darius
D) Irina
E) David

7. How many children have animals with four legs?

- A) all of them B) 3 C) 2
D) 4 E) 5

8. Maia brought her pet in a

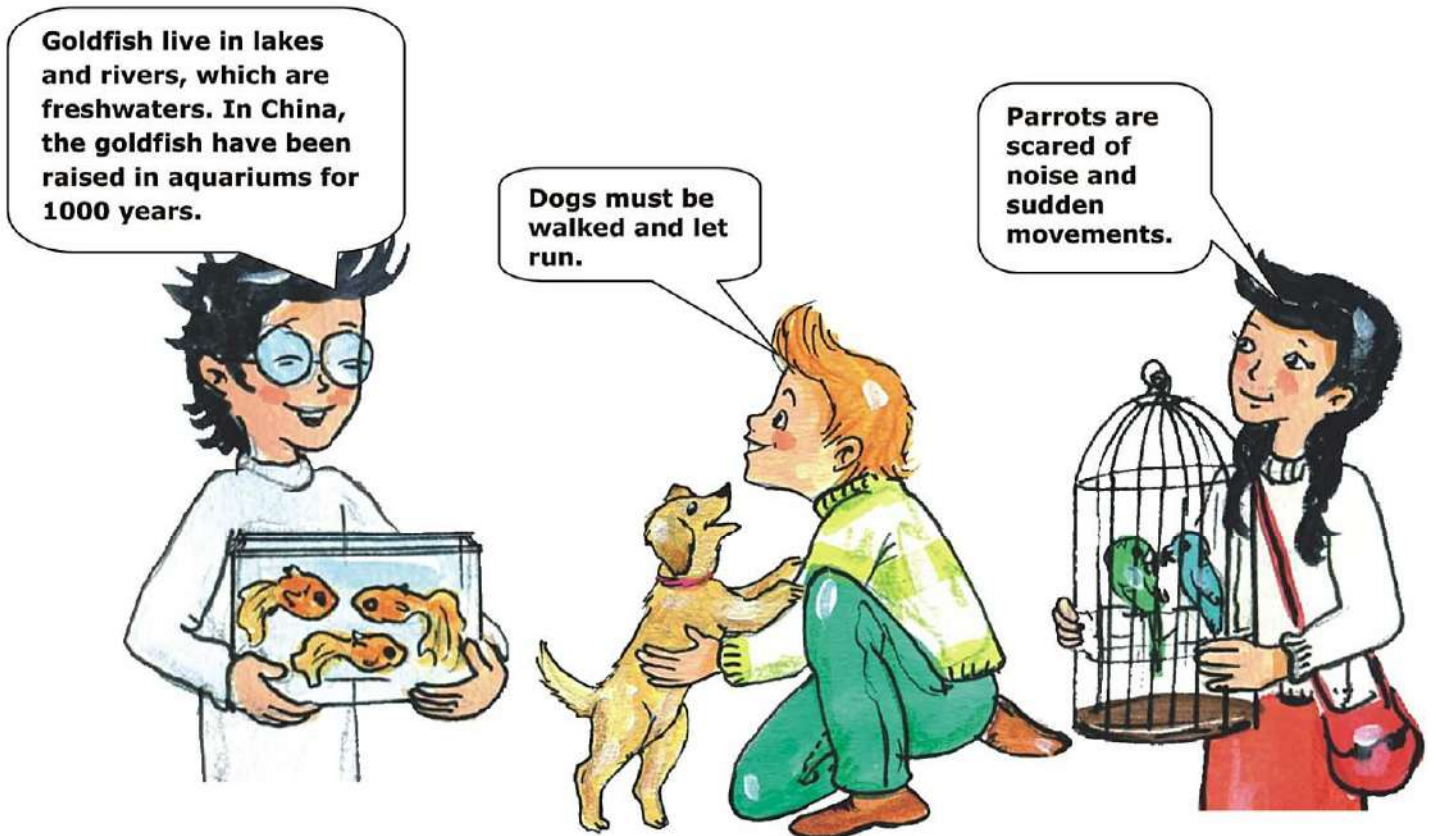

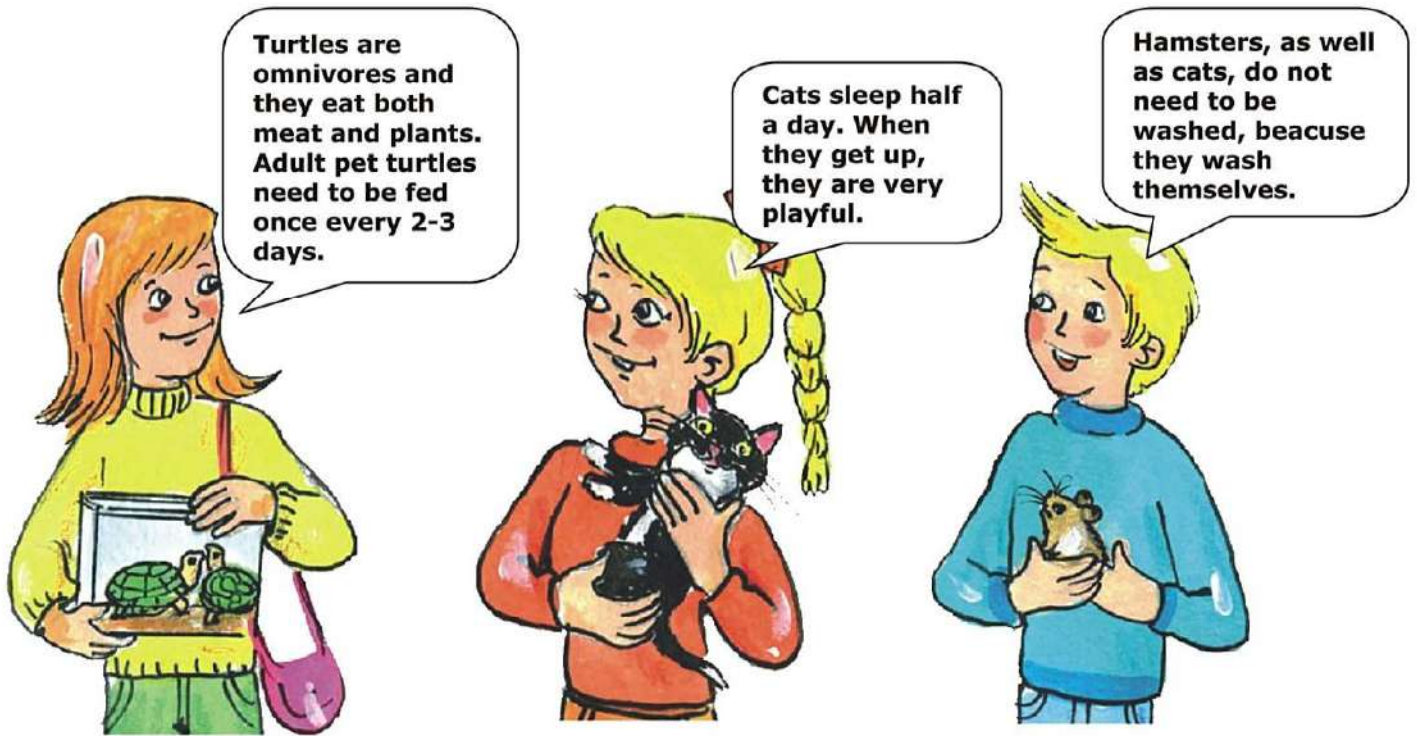

- A) fish tank B) cage C) basket
D) kennel E) bag

9. How many alive creatures are there in the picture?

- A) 16 B) 13 C) 10
D) 14 E) 15

10. The place where animals, especially wild animals, are kept so that people can go and look at them or study them is

- A) The Botanical Garden B) The Astronomical Observatory
C) The Museum of Natural Sciences D) The National Theatre
E) The Zoological Garden

11. Which child has the smallest mammal?

- A) David
- B) Darius
- C) Razvan
- D) Teodora
- E) Irina

12. Omnivores are animals which eat

- A) both plants and meat
- B) only meat
- C) only water
- D) only plants
- E) both meat and water

13. Which child has a pet sensitive to noise and unexpected movements?

- A) Razvan
- B) Teodora
- C) David
- D) Maia
- E) Irina

14. Which animal is considered to be man's best friend?

- A) the hedgehog
- B) the cat
- C) the dolphin
- D) the dog
- E) the mosquito

15. The goldfish live

- A) on land
- B) in the sea
- C) in freshwaters
- D) in trees
- E) underground

The British Shorthair is a robust, furry cat, having a short grey dense coat. Its eyes are big and gentle. The medium weight of a cat is about 7 kg; the males can reach 7-9 kg while females are 4-6 kg. These cats are sensitive to stress and heart diseases. A British Shorthair would be an excellent therapist for a child who can't express very well his feelings. It is said that Romans, after conquering the British lands, started to cultivate the fields and then brought a great number of cats to keep the crops safe from rodents. The cats brought by Romans mated with wild cats, thus giving birth to a brand new species: robust and strong, thus able to endure the difficult weather of Britain.

Maia loves cats. Her favorite is a British Shorthair named Suzi. Maia lives in a block of apartments, on the 4th floor. Outside, right in front of her window, there is an old linden tree. One day Maia left the window open and her cat sat on the window case to watch the birds. While Maia was doing the homework with her friends Razvan and Irina, Suzi jumped off the window to catch a sparrow. Maia didn't notice that. Later, a neighbor came and brought the cat which had a broken paw. Maia's parents took Suzi to the vet who bandaged her paw.

16. Why did the Romans bring the cats to Britain?

- A) to mate them with the wild cats
- B) to play with the children
- C) to protect their crops from rodents
- D) to hunt birds
- E) to keep them for good luck

17. The British Shortshair cats are at potential risk for ... diseases.

- A) stomach
- B) heart
- C) eye
- D) skin
- E) bone

18. An adult male of British Shorthair can reach a maximum weight of

- A) 5 kg
- B) 6 kg
- C) 9 kg
- D) 11 kg
- E) 12 kg

19. What did Suzi want to catch?

- A) a fish
- B) a rabbit
- C) a butterfly
- D) a bird
- E) a mouse

20. What did Maia's parents do when the cat broke her leg?

- A) They took her to the vet.
- B) They bandaged her.
- C) They brushed her.
- D) They gave her some medicine.
- E) They locked her in the closet.

INTERNATIONAL KANGAROO SCIENCE CONTEST 2017

Time Allowed: 60 minutes

23. The African Grey Parrot can live up to

A) 2-3 years

B) 60-65 years

C) 50 years

D) 33-40 years

E) 4 years

24. At what age can the African Grey Parrot reach maturity?

A) 3 years

B) 5 years

C) 1 year

D) 6 years

E) 4 years

Good Luck
